- GitHub
- Azure DevOps

WORK EXPERIENCE

SENIOR SOFTWARE ENGINEER

CROEM PVT.LTD • G-9, Islamabad • Jan 2019 - Present

Senior Software Engineer (Team Lead) at a Fintech company. Responsible for leading a team, overseeing development, providing technical support, and designing robust architectures for innovative financial solutions.

Led a high-impact project that streamlined transaction processing, resulting in a 20% reduction in processing time and improved overall system efficiency, positively impacting client satisfaction and driving increased business revenue.

SOFTWARE ENGINEER

FUTURESOL • Khanna Pul, Islamabad • March 2017 – December 2019

I started my career from FUTURESOL where I developed and maintained cutting-edge software applications, adhering to industry standards and best practices. Collaborated with cross-functional teams to design and implement new features, enhancing user experiences. Resolved complex technical issues through rigorous debugging and troubleshooting. Participated in code reviews, providing constructive feedback, and fostering continuous improvement.

Played a key role in a critical project focused on enhancing application stability and eliminating bugs, implementing rigorous testing protocols, and conducting comprehensive debugging, resulting in a 30% reduction in post-release issues and significantly improving overall software reliability.

EDUCATION & CREDENTIALS

BS-IT (HONS)

University of The Punjab Gujranwala Campus, Gujranwala
2013-2017

ICS (Physics)

Punjab Group of Collages, Gujranwala
2011-2013

MI Wallet (Card Issuing System in Panama)

I contributed to the development of "Wa!" - an all-in-one mobile app that eliminates the need for cash withdrawals. The app offers a range of services, including benefits reception, prepaid card request, savings account acquisition, bill payments, purchases, and QR withdrawals at 1,000+ stores. Additionally, introduced a prepaid card service accessible at www.daimvirtual.com.

By being part of this innovative project, contributed to creating a seamless and user-friendly financial management solution, providing a convenient and cashless experience for our users.

Technologies/ Tools Used

- .Net Core 8 API
- Domain-Driven Design (DDD) Pattern / ABP.IO
- Entity Framework / LINQ / Dapper / SignalR
- IONIC-Angular
- SQL Server
- React Js
- Angular
- Azure DevOps

MiCedulad

Micedulad.com is an award-winning project developed in Panama, aimed at providing essential assistance to citizens of America during the COVID-19 pandemic. Through micedulad.com, we worked tirelessly to support and aid individuals during these challenging times, making a positive difference in the lives of countless people.

Technologies/ Tools Used

- .Net Core 3.1 API
- Domain-Driven Design (DDD) Pattern
- Entity Framework / LINQ / ADO
- IONIC-Angular
- JavaScript /jQuery/ Html, CSS/ Bootstrap
- Azure DevOps
- SQL Server

Noegateway (US Based Payment Gateway)

NeoGateway is a transaction acquiring engine which provides services like Ecommerce, Point of Sale, IVR, SDK, and API for a custom solution. It is integrated directly to Mastercard, VISA AMEX, CLAVE and other networks. The solution has been in production over a decade and is being used in Latin American countries. From processing to clearing and settlement, it enables banks to maintain full Acquiring ecosystem.

Technologies/ Tools Used

- .Net Framework 4 - .Net Core 3.1
 - MVC, MVVM / Domain-Driven Design (DDD) Pattern
 - Entity Framework / LINQ / ADO
 - Angular
 - JavaScript /jQuery/ Html, CSS/ Bootstrap
 - Azure DevOps
 - SQL Server

- Enjoy automated additions of user manuals, valuable tips, and support links for your appliances, home electronics, and tools.
- Experience peace of mind with a secure and safe platform that preserves all your data, readily available whenever you need it.
- Property Manuel is free to use for all your home inventory needs, empowering you to be the master of your domain.

Take control of your home's information with Property Manuel, you can try this because its free.

Technologies/ Tools Used

- .Net Core 8 API
- Domain-Driven Design (DDD) Pattern / ABP.io
- Entity Framework / LINQ / Dapper / SignalR
- IONIC-Angular
- SQL Server
- Azure DevOps

NFT Market Place

I was part of a team that developed a revenue-generating platform designed to captivate visitors and enhance user engagement. Our platform incorporated a powerful suite of intuitive applications, such as Offline Marketing utilizing QR Codes, Interactive Support features including Live Chat, Call, and Livestream functionalities, and robust User Analytics.

Technologies/ Tools Used

- .Net Core 8 API
- Domain-Driven Design (DDD) Pattern / ABP.IO
- Entity Framework / LINQ / Dapper / SignalR
- IONIC-Angular
- SQL Server
- React Js
- Angular
- Azure DevOps

go NDA

Contributed to the development of "go NDA" - an innovative platform that provides users with automated legal templates and real-time execution capabilities, all accessible from their mobile devices. "go NDA" is a welcome addition to the legal landscape, empowering users to access legal templates and execute them effortlessly through the website www.getgonda.com. By being part of this project, played a role in creating a user-friendly and efficient solution for legal document generation and execution on-the-go.

Technologies/ Tools Used

- React-Native
 - Typescript
-

Azhealth24 (IONIC-Angular)

Azhealth24 is a groundbreaking hybrid-cross platform healthcare application, catering to users across various platforms such as web, iOS, and Android. As a member of the team, I contributed to the development of this versatile app, which seamlessly bridges the gap between different platforms to deliver essential healthcare services. By working on Azhealth24, I played a vital role in creating a user-centric and accessible solution, transforming the way users engage with healthcare services.

Technologies/ Tools Used

- .Net Core 3.1 API
- Domain-Driven Design (DDD) Pattern
- Entity Framework / LINQ / ADO
- IONIC-Angular
- JavaScript /jQuery/ Html, CSS/ Bootstrap
- GITLAB
- SQL Server

Fourlead

Fourlead is a cutting-edge job portal based in Malaysia, offering a unique and innovative feature - Behavior Assessment. As an integral part of the team, I contributed to the development and implementation of this platform. By playing a key role in the Fourlead project, I helped shape a transformative solution that revolutionizes the recruitment process in Malaysia, fostering better matches between candidates and employers.

Technologies/ Tools Used

- .Net Core 3.1
- Domain-Driven Design (DDD) Pattern
- Entity Framework / LINQ
- Angular
- JavaScript /jQuery/ Html, CSS/ Bootstrap
- Docker
- SQL Server

Sahulat Services

SahulatServices is a versatile handyman app.

Technologies/ Tools Used

- .Net Core 3.1
- Domain-Driven Design (DDD) Pattern
- Entity Framework / LINQ
- Angular
- JavaScript /jQuery/ Html, CSS/ Bootstrap
- Azure DevOps
- SQL Server

Fox Rehabilitation

For Rehabilitation is a health care web, in which patient and doctor interact and set appointments, and home base health care.

Technologies/ Tools Used

- .Net Core 3.1
 - Domain-Driven Design (DDD) Pattern
 - Entity Framework / LINQ
 - Angular
 - JavaScript /jQuery/ Html, CSS/ Bootstrap
-

- Azure DevOps
- SQL Server

School ERP Solutions

ezSCHOOL-ERP is the easiest and best school and college management software.

Demo at: <http://www.ezschoolerp.com/>

Technologies/ Tools Used

- Asp.net MVC 5
- MVC Pattern
- Entity Framework / LINQ
